ORD 25X1-65
20 October 1965

25X1

Attached is a first cut at a Life Sciences Panel structure. It indicates the ten major functional areas of OSI and ORD and the possible participation of the Panel members in reviewing the individual functions. Perhaps some of these areas could be combined for purposes of the Panel. I have not coordinated this with OSI yet but thought this working paper might be useful in your discussions with Prof. Tobias. The individuals listed in the first column might chair that particular section, but I am completely flexible on other names or other methods of operating.

In thinking about the Panel activities, it seems to me that the overall Panel might meet two times per year to review the total programs of OSI and ORD in the life sciences and perhaps to report the results of the sub groups. I would anticipate that the sub groups might meet as often as three times per year in some areas but less frequently in others. Obviously this could mean a pretty heavy time commitment on the part of some individuals. I will not approach any one other than you and [redacted] about membership on this Panel until after we have had a chance to discuss it. If it would be of any use to you, I would be glad to meet you on the West Coast at your convenience.
